Introduction to the theory and applications of molecular and quantum mechanics. To speed up the G4 method, its MP4 steps have been replaced with MP2 and MP3 . In 2016, a group from the University of Innsbruck developed a method that allows complete simulations of fusion reactions with high accuracy. In 2016, a group from the University of Tokyo developed a method that allows us to analyze the behavior of a plasma under conditions of a quasi-stationary discharge. In 2017, a group from Kyoto University developed a method that solves fusion plasma problems in a quasi-stationary discharge.
